

# Econom-X Indoor Banner Stand

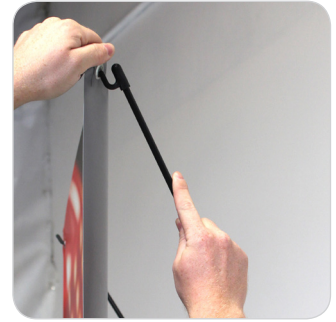

## QUICK INSTRUCTIONS

**Step 1:**  
Extend each of the arms with the hooks until you hear a click. That tells you the arms are in place

**Step 2:**  
The center leg of the stand holds the stand in place. Drop the leg following the groove down until you hear a click.

**Step 3:**  
With your stand completely extended hook your graphic into the hooks with the hook part facing towards you, bending the arms a little bit to hold the graphic up.

\*You can adjust the leg to open how depth you want to.
